## 2012 Corn Yield Response to **Agri-SC®** in Field Trials at Arise Research & Discovery Martinsville, Illinois

FSS/I012A

Made in U.S.A.

Study Director Dr. Roy M. Stephen.  
Population 30,000 seeds per acre  
in 30" rows in **drought conditions**.  
**Agri-SC®** @ 8 oz. per acre.  
Planted May 15, 2012.  
Harvested October 6, 2012.

- 4 replications in a randomized complete block design.
- All results achieved at the 95% confidence level.
- Research indicates significant improvement in yield for both 8 oz broadcast and 8 oz. combination broadcast/in-furrow applications.
- Research indicates **Agri-SC®** significantly improves yield and net dollar return per acre.

**Agri-SC®** is an exclusive product of Four Star Services, Inc.  
Bluffton, Indiana [www.agri-sc.com](http://www.agri-sc.com) 800.348.2608

Corn Yield Per Acre - 17 days over 95 degrees in July  
0.63 total inches of rain in all of June and July
