***DIRECTIONS FOR USE***

Li'l Perk is a commercial anionic liquid additive.

***APPLICATION RATE***

For lawns, gardens, and landscape areas: Add 1 ounce of Li'l Perk to approximately 4 gallons of water. Apply this solution to 5000 square feet of area to be treated.

For houseplants: Add one teaspoon of Li'l Perk to two gallons of water. Apply normal amounts of solution to houseplant soil at monthly intervals.

***APPLICATION TIME***

Li'l Perk can be applied anytime; however for best results Li'l Perk should be applied 2-3 times per growing season -- spring, summer, and fall.

***REFILLS***

One 8 ounce bottle of concentrate will refill the Li'l Perk ready-to-use bottle four times.

***INGREDIENTS***

Active Ingredient:

- Ammonium Laureth Sulfate .....48%
- Inert Ingredients..... 52%
