

- Improves water penetration and enhances soil aeration.
- Formulated especially for golf courses, athletic fields and lawns.

SPEC LABEL

Pene-Turf is a commercial anionic liquid soil-amending additive.

DIRECTIONS FOR USE

Apply Pene-Turf soil treatment to the entire area, both high and low spots.

APPLICATION RATE

Mix 8-10 ounces of Pene-Turf with water to cover uniformly 1 acre (43,560 sq. ft.). The amount of water to be mixed with Pene-Turf will vary with the type of spraying equipment used.

APPLICATION TIME

Pene-Turf can be applied any time; however, for best results Pene-Turf should be applied 2-3 times per growing season -- spring, summer, and fall.

APPLICATION METHOD

Pene-Turf may be applied by any conventional spraying method.

COMPATIBILITY

Pene-Turf is compatible with most liquid fertilizers, insecticides, and fungicides. A compatibility test should be conducted prior to mixing in the spray tank.

INGREDIENTS

Active Ingredient:

Ammonium Laureth Sulfate	48%
Inert Ingredients	52%
